**SECTION 4- FIRST AID MEASURES**

---

**4.1 Description of first aid measures**

- Eye:** Immediately flush eyes with large amounts of water for at least 15 minutes, holding the eyes open with fingers and occasionally lifting the upper and lower lids. Use lukewarm water if possible. If present and easy to do so, remove contact lenses, if irritation persists, get medical attention.
- Skin:** In case of contact, immediately flush skin with plenty of soap and water. Remove contaminated clothing and shoes. Wash clothing before reuse. Call a physician if irritation persists.  
If product vapor or mist causes respiratory irritation or distress, move exposed person to fresh air immediately. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Obtain medical attention.
- Inhalation:** Rinse mouth thoroughly with water. If swallowed, do NOT induce vomiting unless directed to do so by medical personnel. Never give anything by mouth to an unconscious person. Get medical advice/attention.

**4.2 Most important symptoms and effects, both acute and delayed**

- Eye:** Causes serious eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision.
- Skin:** May cause skin irritation. Repeated or prolonged exposure may cause drying and cracking of skin. May be absorbed by the skin.
- Inhalation:** May be harmful if inhaled. High concentrations may cause central nervous system effects characterized by nausea, headache, dizziness, or drowsiness.
- Ingestion:** May be harmful if swallowed. May cause gastrointestinal irritation: stomach distress, nausea, or vomiting.
- Chronic:** Chronic inhalation may cause similar effects to those of acute inhalation. Chronic inhalation may cause liver and kidney damage. Prolonged or repeated skin contact may cause dermatitis.

**4.3 Notes to the physician**

Symptoms may not appear immediately. If case of an accident or if you feel unwell, seek medical advice immediately (show label or SDS if possible).

---

**SECTION 5- FIRE FIGHTING MEASURES**

---

**5.1 Extinguishing media**

**Suitable methods of extinction:** Use dry chemical, carbon dioxide, alcohol resistant foam, Halon 1211, water spray or fog.

**Unsuitable methods of extinction:** Do not use water jets and high pressure water as these may spread the fire

**5.2 Special hazards arising from the substance or mixture**

Contents under pressure. Extremely flammable aerosol. Contains flammable liquid and vapor. Eliminate all ignition sources. Aerosol cans exposed to fire or high temperature can rupture and rocket. Vapors are heavier than air and may travel to a source of ignition and flash back. Vapors can spread along the ground and collect in low or confined areas. During a fire irritating and highly toxic gases may be generated by thermal decomposition or combustion.

**5.3 Advice to firefighters**

Keep upwind of fire. Wear full fire-fighting turn-out gear (full Bunker gear) and respiratory protection (SCBA). Use water spray to keep fire-exposed containers cool. Containers may explode if heated.

**SECTION 6- ACCIDENTAL RELEASE MEASURES**

**6.1 Personal precautions, protective equipment and emergency procedures**

Stay upwind of spill. Keep out of low areas. Use personal protective equipment recommended in Section 8. Isolate the hazard area and deny entry to unnecessary and unprotected personnel. Eliminate sources of ignition. Avoid breathing vapor.

**6.2 Environmental precautions**

Do not allow to enter sewers, drains, or waterways

**6.3 Methods and materials for containment and cleaning up**

**Method for containment:** Contain spill. Absorb liquid with vermiculite or with an inert absorbent.

**Methods for cleaning up:** Scoop up material and place in a lidded disposal container. Dispose of as waste in accordance with all applicable guidelines and regulations. Materials used in clean-up may be considered hazardous waste. Vapors can accumulate in low areas. Provide ventilation.

**6.4 Reference to other sections**

For indications about waste treatment, see Section 13

**SECTION 7- HANDLING AND STORAGE**

**7.1 Precautions for safe handling**

Keep away from sources of ignition- No smoking. Do not spray on an open flame or other ignition source. Pressurized container: do not pierce or burn, even after use. Container may explode if heated. Avoid contact with skin and eyes. Do not breathe dust/fume/gas/mist/vapors/spray. Do not swallow. Use only in a well-ventilated area or outdoors. Avoid welding or other "hot work" in the vicinity using Sean Clean. When using do not eat, drink or smoke. (See section 8)

General hygiene advice: Launder contaminated clothing before reuse. Wash hands before eating, drinking or smoking.

**7.2 Conditions for safe storage including any incompatibilities**

Store in a dry place. Store locked-up. Do not expose aerosol cans to open flame or temperatures above 122°F (50°C). Protect containers from physical abuse. Keep containers upright. **KEEP AWAY FROM CHILDREN.**

**SECTION 8- EXPOSURE CONTROLS/ PERSONAL PROTECTION**

**8.1 Control Parameters**

CAS No.	Ingredient	OSHA-PEL TWA	ACGIH-TLV	NIOSH
67-64-1	Acetone	1000 ppm 2400 mg/m3	500 ppm TWA 750 ppm STEL	250 ppm; 590 mg/m3 TWA 2500 ppm IDLH (LEL)
124-38-9	Carbon Dioxide	5000 ppm 9000 mg/m3	5000 ppm; 9000 mg/m3 TWA 30000 ppm; 54000 mg/m3 STEL	1000 ppm; 1900 mg/m3 TWA 30000 ppm; 54000 mg/m3 STEL 40000 ppm IDLH

**8.2 Exposure Controls:**

**Engineering measures:** Use ventilation adequate to keep exposures below recommended exposure limits.

**Eye/face Protection:** Wear protective safety glasses with side shields or goggles.

**Hand Protection:** Use chemically resistant gloves (i.e. Nitrile gloves). Nitrile/butadiene rubber, butyl rubber, polyethylene, PVC (vinyl), or neoprene gloves are also effective. Glove selection should take into account potential body reactions to certain materials and manufacturer's instructions for use. Break through time of selected gloves must be greater than the intended use period.

**Other Protective Equipment:** Use clothing that protects against dermal exposure. Appropriate protective clothing varies depending on the potential for exposure. To ensure proper skin protection, wear PPE in such a manner that no skin is exposed.

**Respiratory Protection:** If atmospheric levels are expected to exceed the exposure levels, use a NIOSH approved air purifying respirator equipped with an organic vapor cartridge and particulate filter. If atmospheric levels exceed 10 times the TLV or PEL level for which an air-purifying respirator is effective, use a powered air purifying respirator (PAPR). The type of respiratory protection selected must comply with the requirements set forth in OSHA's Respiratory Protection Standard (29 CFR 1910.134).

**Hygiene Measures:** An eye wash station or portable eye wash station should be in the area. Wash hands thoroughly after use, before eating, drinking or using the lavatory. Employees/Users should be educated and trained in the safe use and handling of this product.
